EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. The application has been amended as follows:
3. Please cancel claims 11-22.

Drawings

4. The drawings were received on November 11, 2003. These drawings are not approved.
5. The following changes to the drawings have been approved by the examiner and agreed upon by applicant: The applicant is required to submit new formal drawings detailing the cross hatching as shown in the enclosed drawing changes. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

Allowable Subject Matter

6. Claims 1-10 are allowed.
7. The following is an examiner's statement of reasons for allowance: This invention deals with an electrical power transmission network, comprising a coaxial superconducting cable with which is associated a first reactance, wherein said coaxial

superconducting cable is connected between two of said nodes and at least one inductive element having a second reactance, which is connected in series with said coaxial superconducting cable (claim 1). The above stated claim limitations is not taught or suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

8. Applicant's arguments filed November 11, 2003 have been fully considered and they are persuasive. Specifically, the applicant's argument that Collet requires that 5A and 5B be at a temperature close to ambient temperature and made of solid copper (col. 2, lines 27-29), and that the two wires 7 and 8 be wound on their respective sleeves in opposite directions so as to cancel the overall self-induction of the assembly, (col. 2, lines 66-68), and therefore actually teaches away for the cables being superconductors or the wound superconducting wires being inductive and therefore cannot anticipate claim 1 or render claim 1 obvious, is persuasive and therefore the claims have been allowed.

Communication

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William H. Mayo III whose telephone number is (703) 306-9061. The examiner can normally be reached on M-F 8:30am-6:00 pm (alternate Fridays off).
